GOSSIP FROM BERLIN

The Agitation Against the Sultan Spreading in Germany.

COUNT COLUCHOWSKI'S AMBITION

The Alleged English Dynamite Plot Belleved To Have Originated with the Police ... Interesting Session of the Women's Congress.

Berlin, Sept. 21.—Before starting for his chateau at Alt-Aussee, Styria, Prince Hohenlohe, the imperial chancellor, paid a visit to Count von Munster-Ledenburg. German ambassodor to France, who is spending his holidays at his estate in Hanover. Prince Hohenlohe will remain in Styria for a fortnight. Baron Marschall von Bicberstein, German minister of foreign affairs, is now in Baden, but his leave of absence will end on Oct. 12. In view of the absence of the chief ministers for the next three weeks the foreign office tertainly cannot be very greatly concerned over an immediate crisis in the east. What little diplomatic activity exists now centers in Vienna. Hon. Michael Herbert, first secretary of the British embassy a Constantinople, who so efficiently acted as the substitute of Sir Philip Currie, the British ambassador to Turkey, during the recent absence of the latter in England, is on his way to England on leave of absence. He remained four days in Vienna, leaving there on Friday. While he was staying in the Austrian capital Mr. Herbert had three interviews with Count Goluchowski, the Austrian mini-ter of foreign affairs, who is very plainly showing his desire to make for himself a historic name as a statesman by taking the initiative in dealing with the sultan.

The Sultan's Strength.

Mr. Herbert, according to reliable addrees which have been received here, advised Count Goluchowski to disregard the oft-repeated Turkish menaces of a general massacre of Christians in Turkey. If the powers collectively, or England alone, should send a fleet to Constantinople, Mr. Herbert does not believe that the sultan possess the power to effect a general slaughter of Europeans in the Turkish capital city, and he so expressed himself to Count Goluchowski. Mr. Herbert has also been permitted to repeat to the Austrian foreign minister his estimate, which he sent to the British foreign office, of the forces on land and sea which would be necessary to keep order in Constantinople in the event that the sultan should be

Anti-Turkish Meetings.

The anti-Turkish meetings which have been held in the various populous contres throughout Germany show a rapidly increasing concern in the masof Christians in the Sultan's dom no ns. The Cachone energy have not as not taken so active a part in the agitation as the Protestant clergy have, but the Catholic laity are subscribing I cerally to the Armenian relief funds and the centrists newspapers urge the notes ity of dealing with the sultanpromptly vigorously and finally. Dr. Lober the leader of the centrist party in the reichstag proposes to demand that the government adopt an unequivocal policy in regard to the Turk ish massacres of Christians just as soon as the reichstar resumes its sittings. The Reichsboff, a conservative organ pours out torrents of wrath at the alleged German apathy in the matter of the slaughter of Christians, but the question is whether or not Germany is a patnetic. It is true that the government ernment suppresses any tendency on the part of the semi-official press toward public excitement against the ports, yet from every quarter of the mpire come signs that the great political parties, the conservatives, centrists, Lational liberal and Freisinnige are waking up and will make it impossible for the existence of a government having no distinctive German policy in regard to Turkey, merely saying "ditto" to the Russian or Austrian policy. Dynamite Scare a Trick Upon the Crar.

The English so-called dynamite plot is suspected here, where police dodges are possibly better known than in Ligland, as being a trick upon the ezar. The National Zeitung, in an article on the subject, says: "The English newspapers have made a tremendous commotion over the affair. their articles being obviously aimed at operating on the sensibilities of the ezar." The Vossische Zeitung, however, expresses the belief that there is, or was, a Fenian-anarchist conspiracy, though the paper is not aware how widely divergent Fenianism and anarchy are. The Vorwaerts, the organ of the socialists, views the matter naturally as a police plot and assails Unief Inspector Melville of the Scotland Yard police as the foster father of the Berlin anarchists.

Women's Congress.

Six hundred delegates are present at the first international Woman's congress now in session in the great hall of the Berlin citly buildings. Only two men are in attendance, representatives of the women of Budapost. The matters of international importance to be discussed are the Women's right's question, upon which F. G.

Sewall of Indianapolis will speak, | DEFEAT OF DERVISH among others. In the discussion upon the subject of working women's clubs. Mrs. Thomas Kirkbridge of Philadelohia and Mrs. Ormiston Chant of Lonlon will speak, and these ladies with where will also address the congress ipon the fight of women against alcohol and o bee themes.

OCCUPIED LINCOLN'S PEW.

Mr. Brvan Attends Divine Service at # Presbyterian Church in Washington.

Washington, Sept. 21.-William J. Bryan attended service yesterday at New York Avenue Presbyterian church. The announcement of the fact that he would attend attracted to the church a number of persons not accustomed to worship there. Mr. Bryan is not a stronger to the members of the New York Avenue church. During his congregational career and while Rev. W. A. Bartlett was psstor Mr. Bryan was a frequent attendant upon the services. he usually escorted his father, a tall. striking looking man with heavy gray locks, who was blind or nearly so. Mr. Bryan had a seat in the pew once occupied by President Lincoln, who attended the church under the pastorate of Rev. Dr. Gurley. Rev. Dr. Radcliffe, the pastor, had no knowledge of the intended presence of the presidential candidate until he reached the house. There was only the slightest reference in any part of the service to the pending political struggle. In his prayer the presence asked that in this time of commotion, the Lord would be with the people, and that the president whom they might select would be of the Lord's own choosing, giving the country "peace and honor." At the dose of the service Mr. Bryan went forward to the pulpit, as had been his custom, and spoke a few words, to the preacher. Many of the congregation took advantage of the opportunity to press forward and pay their respects. Is he left the church there was slight cheering by the crowd that waited for his appearance.

THE BRYAN CAMPAIGN.

Progress of the Work at Headquarters in Chicago.

Chicago. Sept. 21.—The democratic committee claim to have received a copy of a circular letter which had been sent by a harvesting machine company of Chicago to its agents throughout the west telling them to supply their travelers with gold literature and instruct them to use it among the farmers the same as advertising matter of the firm. J. A. Wilson, the agent of the company at Carthage. Mo., who received one of the letters, is said to have replied as follows: "You are on a cold trail. Missouri will give Bryan 60,000 majority. If these letters are written by authority of your company any Missouri farmer who uses heir harvester deserves to sell his wheat at forty cents a bushell." Fate of a Yachting Party.

New York, Sept. 21.-A bottle containing the following note was picked up on the beach in front of the Brighton Beach hotel Saturday night: 'Stranded, Sept. 1, sloop yacht Harry C., fifteen unles off Rockaway beach. Raised signals, but never reported. Capt H. Carpenter." The unfortanate skipper was a well-known hotel sceper in Canarsie and has been miss ing since the first of the month, when he went yachting with a party of four. It is very probable that the signals were not noticed by passing vessels and, the provisions running out, the party starved to death. The police believe that the stranded persons were accidentally drowned or in despair threw themselves overboard to escape starvation.

Rev. Louise S. Baker Dead.

Nantucket, Mass., Sept. 21.—Rev. Louise S. Baker, the poet lecturer and pastor, for many years the minister of the orthodox Congregational church here, died Saturday in the little fishing hamlet of Siasconset on this island. Miss Baker was an associate of Mrs. Lavermore and other members of the W. C. T. U., and for many years she was prominently identified with that movement. She was also a poet of considerable ability, her poems "The Life-boat" and "Golden Rod" being especially famous.

Accepts a Position at Dartmouth College.

Lowell, Mass., Sept. 21.-Dr. Gile the assistant superintendent of the state almshouse at Tewksbury, severed his connection with that institution Saturday night, to take the position left vacant by the death of Prof. Frost of Dartmouth college. His friends at the institution presented him with a set of surgical instruments.

Dongola Taken by the British Without Resistance.

THE NATIVE WARRIORS OUTWITTED

El Hafir Also Captured, But Not Until After a Hot Engagement-Twentyseven Grain-laden Boats Also Secured by the Expedition.

Cairo. Sept. 21.—A dispatch from the Anglo-Egyptian expedition states that Dongola, the objective point of the expedition, has been taken without meeting with any resistance from the Dervishes, the place being uncccupied. The dispatch adds that the town of El Hafir, north of Dongola, to which place the Dervishes retreated, was captured after a hot engagement. After the place had fallen into the hands of the expedition, the Egyptians captured twenty-seven grain-laden boats, the loss of which will be a severe blow to the Dervishes. The latter made desperate efforts to recapture the boats. but a heavy fire was poared into them by the troops and the gunboats and they were finally compelled to abandon their attempts to regain possession of the boats and their cargoes. After their defeat the entire Dervish force retreated southward upon Dongola. At the same time the expedition's steamers started for the same place, and being the quicker, reached there before the Dervishes The city was found to be deserted by warriors and the steamers at once landed a force of infantry to hold it until the arrival of the main body of the expedition. At the time the dispatch was sent the Dervishes were approaching Dongola overland, and scouts reported that they were carrying many of their wounded with them. Included among their wounded are some of the most noted chiefs. It is expected that as the Dervishes are without food or other stores that they will make a most desperate attempt to get possession of Dongola. El Hafir was not taken by the troops until after a most stubborn resistance on the part of the Dervishes had been overcome. The riflemen of the latter fought behind well made mud forts and in trenches that were strewn with mats. These defences, however, were soon wrecked by the heavy fire of the Egyptian artillery and the Maxin battery that was manned by the Connaught rangers. The Dervishes stood the fire bravely but were finally compelled to withdraw from the place. Their eavalry took no part in the engazement, remaining some distance off in the desert watching the result of the battle. When the British and Egyptians landed the entire force re-

treated southward. Dervishes Were Outwitted.

ondon, Sept. "1.—The correspondent of the Daily News who is with the Soudan expedition telegraphs that in he attack on El Hafir the Dervishes were outwitted. They all advanced on land to meet the troops, thus permitting the gunboats to slip past the town, sink one of their steamers, and hurry on to Dongola. When the Dervishes saw the move they turned and fried to overtake the gunbouts and save Dongola, but the land forces of the expedition headed them off. The Staffordshire regiment will follow the gunboats to Dongola, and thus the Dervishes will be placed between two fires. Wad Bishara, the leader of the Dervishes, was wounded at El Hafir. He was earr.ed outside the range of the guns. A prisoner states that when he saw that he was defeated he exclaimed: "Allah is against me!"

Silver Service for the Indiana. New York, Sept. 21.—Gov. Claude Matthews and a delegation of prominent.citizens from Indiana, who came here to represent that state in the gift to the battleship Indiana of a silver service, were met this morning by Assistant Secretary McAdoo of the United States navy, and at 10 o'clock were conducted to the dispatch boat Dolpnin at the Barge office. They will be received by Capt. Robley D. Evans, and after inspecting the ship, the formal presentation of the silver service will occur, followed by a banquet and toasts, and, after the ceremonies, the committee will be taken on a cruise down the bay.

Murdered Through Jealousy.

Bridgeton, N. J., Sept. 21.—Simon B. Shaw, aged 58 years, a dissolute charactor at Fries Mill, Cumberland county, raturday night shot and killed Stultz Carlisle, aged 27, of Leesburg. THACHER'S POSITION. His Money Views Unchanged, Nevertheless

He Will Vote for the Chicago Nommeer. Albany, Sept. 21.-Mayor John Boyd Thacher has just given out a statement addressed to Hon. Elliot Danforth, chairman of the democratic state committee, the main points of which follow: "I am informed that the democratic party of the state did me the honor of naming me as its candidate for the high office of governor. I now learn that the state committee is to meet on Tuesday for the purpose of appointing a committee to officially notify me of that fact. It has seemed to me due to your committee that, befree it takes that step, I should make a statement. I cannot ask for the confidence and support of the people of the state without frankly declaring my position upon the financial issue now agitating the public. I stand to-day where I stood in the month of June in the presence of a convention of the state democracy. I have not changed an iota in my belief. nor deviated a step in my course. The commercial honor of this nation is pledged to the world, and the whole world knows that the nation will maintain its honor. I took part in the state convention which sent delegates to represent the party in national convention in Chicago. These delegates by participation acquiesced in the action of the national convention in presenting candidates for the offices of president and vice-president of the United States. The state convention of the democratic party has ratified the nomination of these candidates. I have learned from the fathers, and in turn have endeavored to teach that the democratic party is the vehicle to carry the will of the people into effect. Such a vehicle is constructed with difficulty. but is easily destroyed. Such failure now and then to perform absolutely satisfactory service will not justify the atter destruction of the vehicle. It was not constructed to bear ore burden, but many and various burdens. When the financial burden is finally disposed of the people will still employ the democratic party to support their purposes and to carry them into effect. When they do thus employ that party I, for one, do not want it to be shattered and dismembered, but to be strong, united and-efficient. Therefore I shall cast my vote for William Jennings Bryan and Arthur Sewall. the candidates in due and regular form chosen by a majority of that convention. I regret that I cannot be in full accord on the question of finance with the sentiment of the late convention, but if my position seems inharmonious with the usual attitude of a candidate towards his party it should be remembered that the conditions are also un-

EQUITABLE UNION IN TROUBLE. Poceiver Appointed for Class A--Class

B. Kowever, Solvent. Erie, Pa., Sept. 21.—The Equitable Aid union a widely known beneficiary organization operating throughout the United States, was brought into court Saturday evening on a bill in equity, which asked for the appointment of a receiver for class "A" in the order. The petitioner for the receiver was Albert A. Bowell of Corry, Pa., who is a beneficiary under his mother's certificate in Phelos' union New York state, for 5050. The petition sets forth that class A, which, under the original plan of the institution, provided for the payment of endowment and disability claims at the life expectancy, is insolvent. That the excess of liability in New York is \$161,000; in Pennsylvania \$97,000, in Michigan. 52,200; in Ohio, \$2,800. The total lia-

bilities are \$395,000, with a set-off in cash of \$34,000 and assessments of 570,-600. The court appointed Chauncey P Rogers of Corry receiver and required a bond of \$7.4,000. The Supreme Union in 1895 devised another class, B, and gave its members a chance to be transferred by paying their share of the habilities of class A and the surrender of their old policies. This scheme brought in \$100,000. The order now has 25,000 members, half of whom are in the new class, with 525.5 000 of a surplus above all liabilities. The decree of the court does not affect class B. The supreme president is A.

REBELS SMOTHERED IN A DUNGEON

Prisoners Executed in Public--- Unsuccess ful Effort To Bombard an Insurgent Camp---The insurrection Spread-

ing in the Interior.

Madrid, Sept. 21.—A dispatch to the Imparcial from Hong Kong says that the rebels at Cavite, Philippine islands, captured the monastery there and massacred the monks, putting them to death with knives. Spanish warships afterwards started a bombardment of the rebel position, but the shots fell short and no harm was done to the insurgents. The dispatch adds that over a hundred rebels who had been captured by Spaniards were flung into a small dungeon at Manila. The next morning fifty-four of the prisoners were found dead, they having been suffocated during the night. The Spaniards, with the object of striking terror among the sympathizers of the rebels, make it a practice to execute their prisoners publicly. The men are taken out in batches and shot before the eyes of any one who desires to witness their death. The dispatch further adds that the rebels are making headway in the interior. SHOT DOWN & BURGLAR.

Another Pleeing Wrongdoer Meets Death at the Hands of a New York Policeman.

New York, Sept. 21.—Early Sunday morning Officers Becker and Carey saw three men. John O'Brien, William Walsh and a third, whose name is unknown, leave the cigar store of Alfred Katz at No. 1335 Broadway. Supposing that a burglary had been committed, the officers called the men to halt, but instead of stopping they broke into a run through West Thirty-fifth street. The policemen gave chase and finally captured Walsh. O'Brien at this time was a considerable distance ahead of the officers, and one of them, Carey, drew his revolver and fired twice. The first shot missed O'Brien, but the second hit him in the back and passed through his heart, killing him instantly. The third burglar escaped. A bundle that O'Brien had thrown away in his flight was found to contain six boxes of cigars, valued at \$25. The body of O'Brien was taken to the morgue to await a claimant.

HOKE SMITH FOR GOLD.

He Urges, However, That Democrats Stand Loyal to the Chicago Ticket.

Dalton, Ga., Sept. 21.-Ex-secretary Hoke Smith spok here Saturday afternoon. He referred to an address which he delivered here two years ago in favor of the gold standard. Then he argued that the democratic national convention should declare against the free coinage of silver. Saturday he said that he had not changed his views on the financial question, and he regretted that he could not endorse the financial plank of the Chicago platform. He urged, however, that those who, like himself, did not approve of this plank should remain loyal to the regular nominees.

The Modern Mother.

In her love for the picturesque many a modern mother is in danger of immolating her child's sensitiveness or hashfulness on the shrine of the little one's clothing. For example, a woman, who has collected many quaint and pretty things in frequent trips abroad, lately asked her small daughter if she would like to wear a certain Dutch cap at church on a Sunday morning. The at Buffalo on Thursday, was with little girl hung back at first, and no Senator Hill Sunday afternoon for wonder; the white head-dress had two great face flaps, which swung on each side of the head like wings, and attracted as much attention when the juvenile consent was finally gained as did the minister's preaching. That with Senator Hill when Mr. Danforth mother, although in the main a wise called. The plans for carrying on the sort of person, never paused to reflect that she was doing one of two undesirable things-either the conspicuous dress would wound the wearer's feelings by the notice which it obtained, or it would make her callous to the same. and so bold that she did not mind a stare or a laugh. Either of these resuits is a real evil, and one to be deplored.—Philadelphia Public Ledger.

Shot for Disobeying Orders.

The last time a British soldier was: shot for disobedience of orders is believed to have been during the month of April, 1860, when a private of the Fifth Bengal regiment was court-martialed and shot for disobeying the orders of a lance corporal by refusing with two others to take a comrade to the guardrrom. The one who was shot was on duty at the time.-Chicago Inter Ocean.

Presidents of This Republic Are Not Well Remunerated.

They Have Expenses Which Howlers for Economy Do Not Take Into Consideration-How Our Affairs Are Administered.

[Special Washington Letter.] The plain people of this republic are about to conter upon William McKinley. of Ohio, or upon William Jennings Bryan, of Nebraska, the highest office within their gift-that of president of the United States. It will be pertinent for a moment to glance at this office, its duties and emoluments. There are upwards of 70,000,000 citizens of the republic, and only one of them can at any one time hold the chief executive office.

There are three great branches of our government, the legislative, the executive and the judicial. The legislative branch consists of 356 representatives, who are elected every two years, and 90 senators, who are elected for terms of six years each. There are 45 states, and each state is entitled to two senators, making a total of 90 senators, The congress constitutes the legislative branch of the government, and consists of the house of representatives and the senate. In the south wing of the capitol the house of representatives assembles, and in the north wing of the capitol the senate assembles. These two gatherings of statesmen originate all of our laws; but they must have the approval of the president before they become of force. It is the duty of the president to execute the laws, and he is the chief executive. It is the duty of the supreme court, consisting of nine judges who serve for life, to interpret the laws. Any law which passes both houses of congress and is approved by the president, takes effect at once. But, if the law shall be taken before the supreme court for its opinion, and the court decides that the law is not in accordance with the constitution, they call it unconstitutional, and thereafter that law ceases to be a law, and cannot be enforced.

Thus the three branches of our government consist of the congress of 446 senators and representatives as the legislative branch: the president, who is only one man, constitutes the executive; and the supreme court, comprising nine men, constitutes the judicial branch; and all three of these branches of the government must work in harmony or there would be anarchy.

On next election day the people will elect a president and vice president; and

THE WAY HE SHOULD APPEAR.

356 representatives, commonly called members of congress. They will also elect state legislatures, and those legislatures will elect senators to go to congress to fill vacancies. According to the constitution one-third of all the senators must be elected every two years, although each senator is elected for a term of six years. Consequently, the coming elections are of vast im-

The supreme court is made up of nine judges who are not elected by the people. The president appoints the judges for the supreme court, with the consent of the senate; and no judge can serve who is not confirmed in his position by the senate. Each of these nine judges, including the chief justice, is appointed for life. Consequently they are far removed from the plain people. The founders of this government deemed it wise to so constitute the supreme court, in order that those learned lawyers may be entirely free from the passions of passing events; so that they might be able to render righteous judgment in all cases. As a general thing, the judgments of the supreme court have justified the wisdom of the framers of the constitution.

The senators and representatives each receive a salary of \$5,000 per agnum. They are also paid ten cents per mile in going to Washington and returning to their homes. This is intended to cover all of their traveling expenses, They also have each a private secretary at \$100 per month. The expenses of the congress, which is the legislative branch of the government, are very high. The vice president and speaker of the house of representatives each receive \$8,000 per annum. The speaker of the house controls all legislation. The vice president is absolutely without power or authority of any kind except that, under the constitution, when there is a tie vote in the senate, the vice president may east the deciding vote.

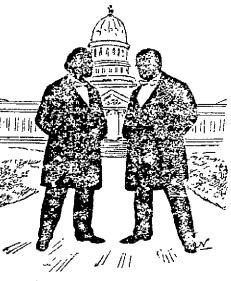

The nine members of the supreme court receive \$10,000 each per annum, and the chief justice receives \$500 additional, making his salary \$10,500, These gentlemen serve for life, unless ine cpat tated by reason of age or infirmities. Each associate justice is entitled to retire from active service when he reaches the age of 70 years; but, if in health and vigor, a judge determines to remain in active service, he cannot be displaced.

The president receives a salary of \$50,-000 per annum. That seems like an enormous salary, but, as a matter of fact, it is no more than is paid to the

missia amea, ador to this country, a is a small pittance compared with the salaries paid to the chief executives of other nations of the civilized world. The kings, emperors and rulers of European nations not only receive large annual incomes, but they have perquisites of all kinds. The president of this republic has no perquisites.

It is expected that out of his salary of \$50,000 per annum a president should save enough to keep him comfortably in after life, for we never want to see all ex-president in want, or obliged to work when he is in the sere and yellow leaf of life. But how can a man in such a postion save any money at all?

He must receive and entertain the representatives of all the nations of the world. He must give public reception-

to the senators, to the representatives, to the ambassadors, ministers, consuls. and other foreign dignitaries. All or these state functions, which are necessary incidents of his office, must be paid for by the president out of his salary. and they are very costly. Moreover, on the first day of January of each year, the president gives a New Year's reception which costs not less than \$1,000 alone. That is a starter for the expenses of each year. In accordance with the customs of the times and the high character of his guests, the president cannot give a state dinner which will cost less than \$1,000, and they usually cost upwards of \$1.560 each. There are not less than ten state dinners each year. These state dinners, in addition to the New Tear's reception take at least \$15,000 out of the salary of the president, leaving him actually but \$35,060 for himself as a public man; one who is regarded as the ruler of the greatest no tion in the civilized world,

The president is obliged to buy his own horses, keep his own carriages. maintain the expenses of his equipages and provide for his family besides. There is one private citizen in Washington who expends upwards of \$50,000 annually in the maintenance of his family according to social customs. In New York and other large cities, there are men who expend more than \$100,000 per annum on their families. And yet the president is expected to maintain his family better than the best. The man who receives \$35 per month can not very well maintain a wife and family on the same style with his neighbor who earns \$100 per month; and you will readily see that it is difficult for any man with a salary of \$35,000 per year to keep up a social equality of appearance with the man who can afford to spend \$100,000 each year out of his income. Thus you see that although the president apparently has a salary of \$50,000 per annum it dwindles by comparison and by virtue of his circumstances. A millionaire may wear a shabby coat and give cheap dinners if he chooses to do so; but a president cannot wear a shabby coat, nor allow his wife to appear in public with anything but the best is the land. At all public receptions the president's wife appears by his side. She must not appear like a neglecte l wife. On the contrary she must have the best of everything; and the people want her to have the best, too.

Some of our good old-fashioned per ple, who believe in simplicity, will say that because others wear d'amonds and silks, and costly ornaments, that is no reason why the president's wife should have such things. But if any good man who entertains such views will ask his wife or daughter for an opinion, he will find that the ladies will tell him that no woman can afford to go into society without keeping pace with the society in which she goes. It may not be exactly the kind of society the old gentleman would organize if he were creating the world. But it is the kind of society which exists, and the majority of us do not want our president or his wife to

feel like paupers in the presence of princes. Rather would we have our president and his wife appear as princes and let the gentry from abroad feel like paupers in the presence of the man and wife whom we have sent to the white house by the power of our votes east at the ballot boxes, thereby expressing the will of a sovereign people, who, in their majesty and in the aggregate of their unity, are greater than hereditary sovereigns. None of our ex-presidents has ever

suffered financially, because all of them have been self-supporting, self-sustain ing men before and after accession to the great office. The only living ex-pres ident is a lawyer, and he recently received a fee of \$15,000 in one case. In 1889 or 1890, while he was an ex-president, a lawyer nam 1 Crover Cleveland received a fee of \$10,000 for arguing a case before the supreme court. SMITH D. FRY.

Present Indications of the Coming Style

in Ladies' Dress. It is too early yet to predict with certainty what all the styles for next autumn and winter are to be, but there are some straws which show the way the autumn winds will blow, and women of keen observation already are noting some of the signs. Braiding will be one of the new fashions, and even now is seen on the summer gowns. A gownof pale yellow pique has the broad collar of the Eton jacket a mass of white soutache braid, put on in a most intricate pattern, and sewed only on one side, so that it stands up in a distinct line. Among the smartest gowns is a trousscan that one of the sammer brides is displaying a gown of dark butchers' linen with the body of the waist covered with this same braiding. The blouse front is exceedingly graceful in the way it hangs, and the pattern of braiding is so eleverly arranged that it gives a long line, and does not cut the figure as an ordinary braided waist sometimes does. On the more elaborate cloth costumes broader braid is laid on in rows an inch apart, sometimes entirely around the skirt, again only on the side breadths, finished with small cricket buttons at either end. This braid is sewed on to the sides and is laid flat

on the material. Braiding is pleasant work, and it is possible for a woman to braid a waist gown or jacket, so that it will look as though turned out by a professional, if she has the pattern carefully stamped. Black cloth costumes braided in the front breadths, or with front breadths plain and side breadths braided, are to be among the winter gowns, while brown with green braiding will again be fashionable.

The Turkish jackets, heavily braided in gold and finished with ball fringe, are occasionally worn with summer gowns, and over the full blouses of white chiffon are exceedingly smart. These jackets are sleeveless, and the soft folds of the chiffon or mousseline de sole are in pretty contrast to the heavy cloth and the gilt braid. The Turkish braiding is, of course, very much more elaborate than any other, and is sewed so that the flat effect is presented.

The cloth waists next winter are to have the body of the waists braided and the sleeves plain. This will give much the same effect that having the waist of lace or chiffon has done, and cannot be called an absolutely new idea: but it is a becoming style, and so is bound to be popular, although many women prefer the pointed braided vests. with collar and cuffs to match; when the latter style is chosen, the braid is put on velvet, and gives a much richer look. The odd contrasts of color will die out by this means, it is said, but that remains to be seen.

Cut-work and appliques always are in fashion when braiding is, and lace is appliqued on the most incongruous of materials. Laid on satin, the rare pieces of old point show to great advantage, but it does seem like vandalism to see lace on some tawdry cotton gown. laid over a bit of odd-colored silk, without any apparent reason. For instance, an apple-green muslin made up over chite taffeta, smart looking, to be sure. but of quite inexpensive quality, has a trimming on the waist of real valenciennes lace appliqued on green silk in long points, sewed down to outline the figure most becomingly. Lace is always so beautiful it seems a pity to use it in such a fashion, and to cut it so ruthlessly as must needs be done to make the jacket effect.-Harper's Bazar.

Sweet Herbs.

From some dim and misty corner of memory comes a waft of pennyroyal. A hillside, thickly carpeted with the line pungent growth, a group of children at play, a summer afternoon, blue sky, white clouds, the sound of a splashing brook, and the freshness of life before it had known sorrow or guile -all are blended with the homely pennyroval. Aromatic and fragrant, its later associations are with Adirondack camps, and nights when gnats and mosquitoes bombarded the veranda, but its first and dearest memory is of happy wanderings in lovely woods and fields. It was once part of every matron's care to gather bunches of catnip, mint, sweet-fern, and other herbs, and store them away for future use. Many a bitter decoction, potent in times of illness or fever, was brewed from these dried herbs, and perhaps from very terror of the nauseous draught, the invalid hastened to get well. Of the lavender, which made sweet the liner closet, of the bay leaves used for flavoring, of other sweet herbs which grew for pleasing and for healing, we have agreeable recollections, though the fashion of gathering them has largely gone out, except among the quaint and patient Shakers, who find it profitable to distil remedies from the herbs which hide the secrets of nature's heart. Liniments, clixirs, cough struct and notions galore are coappounded of sweet-smelling and bitter herbs by these kind peotde.--Harper's Bazar.

THE COMMODORE'S DYING JOKE

Heard a Reporter Wish Him to Hurry Up, and Pleaded Inexperience. Some reporters were waiting for news after midnight recently of the condition of Cornelius Vanderbilt. It is no fun to kick your heels against the pavement until three or four o'clock in the morning, and the reporters grew restless. "This reminds me," said one, reflectively, "of the death watch on the old commodore. Things were quite different then from what they are now. When the old commodore was just taken ill he used to send for us every day and have us up in his room and tell us all about himself. He used to read the papers, and he noticed that a great deal of snace was devoted to him.

"Well, boys,' he said, one morning, I hope I live a little langer, for your sakes. You seem to be making a lot of space out of me."

"Finally, though, when he "became too Il to see us, we had to camp out as we ire doing now, and it soon became redicus. We used to camp about 20 feet from the front of the house in which the old centleman by, and sometimes you could hear what was said in the siekroom.

On the paper was a score or so of words written in the old commodore's well-known sernwl. They read:

"I frest you will parden me, bur as this is the first time I have ever died i am a little inexperienced and don't exactly know how to go about it. If you will bear with me a little while, however. I will try to do my best."

MONDAY, SEPT. 21, 1896.

For President WILLIAM JENNINGS BRYAN, of Nebraska. For Vice-President

ARTHUR SEWALL, For Governor

JOHN BOYD THACHER, of Albuny. WILBUR F. PORTER.

For Judge of the Court of Appeals ROBERT C. TITUS,

There is no "Gold Democrat" in the State more anxious to have a third ticket nominated than the Honorable Patrick Jerome Gleason, Mayor of Long | knees. Island City. And if a third ticket is nominated the Honorable Patrick is absolutely certain that he is the man who should head it.

Reproducti papers which are honest with their readers acknowledge that the Maine election removes none of the uncertainties of the campaign. It merely shows that the people of that State could not in a few weeks be educated up to the point of accepting free silver coinage as an improvement on the gold standard, which for years they have been taught to believe is the sum and substance of all good. In the West and South conditions are different. There the agitation for free silver has been going on for years, and in the middle western states where the campaign will be lost and won farmers and workingmen are much more progressive and receptive, much less hidebound and conservative than in Maine and are much more ready to break away from old party ties and accept new political doctrines. The hope of the Democracy is the intelligence and broadmindedness of the men "who toil in the sun" on western farms and in western cities.

At the Saratoga convention in June, John Boyd Thacher unequivocally declared himself a believer in the maintenance of the gold standard. He has neither | money exchangers, etc., can hold their dicated a change in his views on this subject, and, therefore, he has a right to assume that the convention which nominated him for Governor knew where he stood on the financial question. In his letter of acceptance he manfully reiterates and reaffirms his position, but declares his intention of supporting Bryan and Sewall because they are regularly nominated candidates of the Democratic party, and because he deems the preservation of the Democratic party necessary for the well being of the country, and knows that after the financial question is settled there are many duties that the Democratic party can and will perform and he "does not want it to be shattered and dismembered but to be strong, united and efficient,"

Mr. Thacher's letter is a frank and open appeal for the support of gold Demotrats. He reminds them and all other | Victory was the object at which they Democrats that the Governor of this aimed, and it was their duty to select State has no official connection whatever, the man who gave the hest promise of its with matters pertaining to the national currency and that there are State issues, made by the Republican legislature's reckless abuse of power for partisan ends, which demand the attention of all citizens and in the interest of good, economical and honest government require a change of administration. This is only possible through a union or Demoeratic strength, and in view or Mr. Thacher's trank avowal of his beliefs and purposes nothing but a determination to destroy the Democratic party can lead the so called gold Democrats, to the folly and crime of placing a third ticket in the field. It can serve no other purpose than to make sure the electron of the blackguardly Black, who has proclaimed his beher that Democrats or ten years' standing are past praying for, who is Platt's tool and creature and who, it elected, will perpetuate Platt's rule and power and be a Governor not in the interest of all the people, but in the interest of a grasping and intolerant faction of the Republican party.

The parson who preaches politics instead of religion was very much in evidence, yesterday, and from more than a dozen New York pulpits political harangues and philip es were launched by preachers who, in their craze for sensutionalism, torgot the sacredness of their holy calling. One or these monthers of politics declared that "gold is God's standard,"--a statement as irreverent as untrue; another declared tree silver can alliance of a lie and thier, another conden ned the Chicago platform as "anarchistic," and another as a 600 miles. He hopes to make the record "platform of dishonor." And so on 5,000 before the senson closes.

through all the list. There was in all the political sermons the same noticeable lack of argument, and the use of abuse and invictive instead of appeals to the reason. And back of every one of these indecent harangues was the cant of the Pharisee,—the unwarranted assumption that the speakers are more patriotic and are inspired by nobler motives than those who hold to different views of finance and governmental policy.

The Albany Argus is against Bryan and Sewall but is earnestly supporting the Democratic State ticket. This isn't the kind of Democracy we like; it isn't the kind of Democracy that has distinguished the Argus during its long, useful and honorable career, but it is a distinct improvement on the Democracy of some papers and some individuals, who, while insisting that they are loyal to the cardinal principles of Democracy are against everything that is really Democratic.

A REPUBLICAN FARMER'S VIEWS Correspondence of the Port Jervis Gazette.

Nearly one-half our population are engaged in agricultural pursuits, and they are rapidly being reduced from independent home owners to tenants, and with this comes the aristocracy and the seris. To-day we have a greater portion of tenant families than any nation in the civilized world, with the exception of Great Britain, to whom a certain class of "patriots" think we should get down on our

If a farmer borrowed \$2,000 on his farm when wheat was \$1,00 per bushel. he figured on raising 2,000 bushels to pay off the mortgage. If the price of wheat dropped to 50 cents p.r bushel, or w purchasing price of the dollar doubled, in other words if

had to give two bushels of wheat to buy a dollar, he would have to raise 4,000 bushels to pay the debt. He figured on raising 120 bushels of wheat at \$1 per bushel to pay the interest. When wheat dropped to fifty cents per bushel, he had to raise 240 bushels to pay his iuterest. If his taxes were \$50 when wheat was \$1 per bushel he had to raise 50 bu hels to pay his taxes. When wheat dropped to 50 cents per bushel he had to raise 100 bushels to pay his taxes. Debts, interest and taxes do not decrease with the iall in prices of properties and commodities. The salaries of public officials have not decreased.

When the farmer is making money be can spend money. He can buy from his merchant. When he can make none he gets along with little, his buildings decay and tall to the ground, he loses his farm, unable to longer compete with the increasing purchasing power of the dollar. Increase the amount of money by opening our mints to thefreecolaage of silver: give it tree carculation, which is of vital importance, and prices will rise, he can get out of debt, again become independent and have money to buy the products of other industries. Trusts, monopolies, said nor written anything since that in- prices up, but others can not. This is why the money power wants the gold standard, scarce money, with its great purchasing power.

> JOHN BOYD THACHER. From the Albany Times-Union.

The nomination of John Boyd Thacher for Governor is met with acclamations of approval from Democrats throughout the Empire State, irrespective of factions or monetary belief. His past record proves that he stands for all that is honorable. Conservative, and yet withal a loyal Democrat, he is the logical and ideal candidate for this campaign. Political lines are strangely demarcated, and it was a delicate and ardnous task that the delegates to the Buffalo couvention were called upon to perform. To nominate a man who would be antagonized by the battalions of the Democratic party in either the gold or the silver camps, would have been political suicide. attainment, and the present Mayor or the Capital City was that man.

A PREDICTION VERIFIED.

From the Chicago Tribune Jan 16, 1878. To undertake to do the business of the world on a single gold basis of measurement and equivalents means loss, bankruptcy, poverty, suffering and despair; debts will grow larger, and taxes become more onerous. The tarmer will receive small prices for his crop., labor will. be forced down, down, down, and there will be a long series of strikes, lockouts and a suspension of productions. Those who own property but owe for it in part, will see their mortgage increasing in proportion as gold acquires the purchasing power, while the property atsentwill be shamking in value. There will be no rehel, it must be kept in mand, for gold will be the only recognized equivalent of values, the stock of gold with its power will be constantly growing and the circle of wealth will be uniformly contract-

LOCKED OUT MINERS USE DYNAMITE

The Coronado Mine at Leadville Attacked, This Morning-Firemen Shot White Attempting to Extinguish the Flames-Every Building at the Mine Reported Burned - Other Mines At-

BY UNITED PRESS.

LEADVILLE, Colo., Sept. 21.-Driven to desperation by starvation Leadville's locked out miners attacked the Coronado mine with dynamite and guns, at 1 o'clock, this morning. The heavy explosions aroused sleepers in the eastern part of the city.

The mine is beavily guarded by special police behind stout barricades and the explosions were followed by many rifle shots from the vicinity of the barricade surrounding the mine, which, are thought to have been fired by an attacking force to cover the retreat of the dynamiters. The shooting lasted about ten minutes and since then has been followed by scattered firing. Telephone connection ceased after the first explosion.

Another explosion, presumably of dynamite, was heard afterwards, and was followed by a bright blaze in the vicinity of the mine. Firemen and the militia went to the scene and found the works of the mine ablaze. The strikers attacked the firemen and endeavored to prevent them from playing water on the flames, but a stream was finally turned on.

A series of explosions was then heard in the direction of the Emmett and Marion mines, and it is supposed an attack was made on them.

A later report says Fireman Oakey was fatally shot while attempting to turn on Two unknown men were atso killed. It is rumored that every building at the Coronado mine was burned.

The owners of the mines have refused to listen to any proposition from the employes, who want \$3 a day for all classes oi work.

It is now known that six men are dead or fatally hurt and one seriously hurt, and there are reports of more fatalities The conflict at Coronado was kept up for hours. Besides the Coronado works, a number of frame dwellings near, with their contents were burned.

A Large Barn Struck and Burned-A Strange Experience. From our Umonville Correspondent.

During the progress of a heavy thunder storm, which passed over this place on Saturday evening last, the large barn of James VanGilder, near Quarryville, was struck by lightning and entirely consumed with its contents.

At the time the building was struck Mr. VanGilder was distributing feed to his rows and a wheelbarrow which he was using was splintered by the fluid. The cows were liberated and all rescued.

"THE HONOR OF CITIZENSHIP."

Rev. Dr. Wm. A. Robinson's Eloquent

Sunday Evening Address. Rev. Dr. Wm. A. Robinson spoke to a large audience. Sunday night, on "The Honor of Citizenship." He took for his text Acts xxi:39, "A citizen of no mean city." He made brief reference to Tarsus, the birthplace of Paul, and said that it would be well for any man to speak well of his city. State or country. The American people have reasons for being grateful for American citizenship and what that means is shown in that which has been gained by historic struggles. Secondly as shown by the process of definition in this history of our own country, and thirdly as enforced by the questions and issues which come to us, a nation, for solution. He drew three lessons for the citizen. First, his citizenship should be larger than partisanship; second, intelligent study of issues presented is demanded, and third, that our course in the discharge of citizenship should be patriotic and conscientious. The moral bearing on a question should be looked at and we should not be citizens for our class or section, but for the whole country.

Fruit Thieves at the Children's Home.

Mrs. Winters, matron at the Children's Home has been greatly annoyed of late by boys stealing from the orchard at the Home. On one occasion she sent one of the boys at the home to warn some young thieves away when one of the roung scamps drew a revolver and threatened to shoot.

Mrs. Winters is determined to put a stop to the depredations of the boys and gives a fair warning through the papers.

Harvey Gardner Says He Stopped a Bullet,

Harvey Gardner, colored, is at the lewburgh court house suffering from a wound in the head, which he says was made by a pistol ball, but which he refuses to allow a doctor to probe, so that the exact nature of his injury cannot be le rned. The injury was received early early Saturday morning, near Quassair Bridge, and Gardner says was inflicted by a white man.

A Horse's Leg Broken.

Two young men of this city hired a norse of Frank Wilson, yesterday, and drove to Bloomingburgh. While driving down a ste-p hill the horse stepped upon a stone, which turned with it, and the the hooi.

The horse was placed in a barn and Mr. Wilson and a veterinary surgeon went to Bloomingburgh, this morning. to see what can be done for it.

Private Hop at Mænnerchor Ball.

J. R. Kirchner, who will furnish the dinner for Eagle Hoset'o'npany and their guests on parade day in Mænnerchor Hall, has rented the hall for two days, Oct. 7th and 8th, and will give a hop on the evening of the 7th. Good music will be provided and refreshments will be served to those who desire them. An admission fee of twenty-five cents per couple will be charged.

Meeting of the Archdeacoury of Orange-

The annual meeting of the Archdeaconry of Crange will be held in Grace Church, on Wednesday. Bishop Potter will be present. About fity delegates are expected, for whose entertainment arrangements have been made at the Commercial Hotel. Service will be held at 11 a.m. and business will be transacted in the afternoon.

Set on Fire by Burglars.

The cigar and confectionery store of Joseph Stott, at 476 Broadway, Newburgh, was destroyed by fire early yesterday morning. The loss is not heavy. Circumstances connected with the breaking out of the fire warrant the belief that it was started accidentally by burglars who were rithing the store.

A Window Smashed In.

The large ground glass window in the door of Douglas's cafe, on James street. was broken by some miscreant early last Miles "Ain Pills." "Once cent a dose." evening. It was all right when Mr. Douglas visited the place yesterday morning, but when he went there last evening to light the gas he found the window broken.

A HANDSOME NEW HEARSE.

Made Entirely in Middletown and Very Hard to Reat.

Knapp & Merritt, the undertakers, have a new hearse that is very handsome and vited her to stop with them until her; will compare favorably with any in the largest cities and best of all it was made entirely in Middletown with the exception of a portion of the running gear, which was made over by L. C. Terwilliger.

The body of the hearse was made by Mr. Merritt bimself from a design of one seen by him at the World's Fair, whereit AT THE COUNTY SEAT. was exhibited by a Rochester firm. It is elaborately carved and highly polished. The top is supported by six hand carved columns; the sides and ends are of French place glass; the curtains are of broad cloth with heavy bullion fringe. There are no plumes or other ornaments on top. The hearse is massive in appearance and the solid black is relieved only by the silver plated lamps and bubs.

The work certainly reflects credit upon Mr. Merritt's skill.

STRUCK BY AN ELECTRIC CAR.

W. H. McCarter Run Down for the Second

W. H. McCarter was struck by an electric car in front of the new academy, Saturday evening. He had been looking at the building and stepped into the

street from behind a pile of brick just as Mortorman Casey was in charge of the car and of course did not see Mr. McCarter until his car was upon him, nor did Mr. McCarter see or hear the car in time

The corner of the car struck Mr. Mc-Carter on the shoulder and fortunately knocked him to one side clear of the rails. His shoulder was very badly bruised and he is suffering from shock.

This is the second time Mr. McCarter has been run down by an electric car, the first time being about a year ago when he was struck at the corner of Academy and Little avenues, less than 100 feet from where the accident happened. Saturday evening.

LOOKED LIKE A FIRE.

Why a Passer-by Thought the Hotel Elberton Was on Fire, This Morning.

When a fire was started in the Hotel Elberton, on King street, about 9 o'clock. this morning, the smoke was blownfrom the chimney into an open window of the cupola and from there through the open window of a room on the second floor. A passer-by, who saw the smoke pouring out of the window, thought the building was on fire and a still alarm was given and a length of hose was laid by Eagles from the hydrant in front of the building. It was then discovered that there was no fire except in the stove and the monentary excitement was quickly

week. He returned home, yesterday, -The Goshen Railroad Club will play the Greycourt ball team on the Grey court p easure grounds on the atternoon

of Wednesday, Sept. 23d.

—Tickets for the exhibition of "Gibson Pictures" at Music Hall. Tuesday night, may be secured at the drug store or Power & Co., at fifty and twenty-five cents each. The date of this up-to-date entertainment is awaited with interest by a large number of people. The artist Gibson is famed for his drawings of beautiful women, and it is currently reported that the young ladies who will take part in this entertainment can discount the fairest picture that Gibson has ever drawn and it is undoubtedly true, for they are all Goshen girls, you know. The exhibition of pictures will be followed by dancing.

-The Goshen base ball team met their Walden antagonists at the latter place. Saturday afternoon, and when four and one-half closely contested innings had been played rain interiered and stopped the game. The score was even. 4 and 4. At that time Walden had had their half of the fifth and Goshen was at but with one man out. The Goshen players had just "found" Dawson's delivery when the rain commenced and were batting him with ease. The teams lined up as follows: Goshen-Landy, s. s.: Miller, c. f.: Kieran, p.: Lawler, 3b.; O'Neal, c.: Kiggius, l. f.: Seward, r. f.: Corbett, 1b. Walden-Rollett, 2b.: Decker, 1b.: Stickles, c. f.: Cosgrove, c.; Bingley, s. s.; Nichols, I. f.: Dawson, p.; Hatch 3b.; Scott, r. f. The score by innings:

Dutchess County Apples for the English

Dutchess county's apple crop is unusually fine this year and many farmers there have arranged to ship the entire products of their orchards to England, where much better prices are realized than in this country. Only perfect fruit is shipped and much care has to be exercised in packing, but the prices realized have in the past amply paid for all the extra trouble.

The Bicycle Sale a Failure,

The attempt to dispose of a number of bicycles at auction at 11 James street was a failure and the young men who had charge of the wheels have packed them up and they will be taken to a more promising place. Only a few of the wheels were sold at private sale at prices ranging from \$28 to \$35.

Dates for Rifle Practice Changed.

The garter has become a thing of beauty, but it remains a hygienic abomination, according to the dectors. This refers to the round garter-the compressor of muscles, thehindrance to the circulation and the benumber of nerves. And it is this instrument of torture upon which the manufacturers have lavished their attention until it has become so pretty an affair, with its filligree buckles and its ribbon bows, that only the most Spartan of women can re-

The round garter, fastened above the knee, is not considered by physicians quite so deadly as the tightly-drawn corset. There are no ribs in the leg to be compressed, and the vital organs of the body are not located in the neighborhood of the knee. But next to the injurious compression of the waist, bust and abdomen by stays, the hygienists place the compression of the leg by elastic garters. The rubber bands which encircle the flesh just above the knee are dangerous because of their effect upon the muscles and upon the circulation. The veins are contracted, and the blood of iecessity is retarded in its flow. The result is not merely local injury, but harm to the whole system, which is affected by the sluggishness of the circulation.

But the danger does not merely lie in an impaired circulation, but is also muscular. In walking the muscles just above and just below the knee are brought more into play than any others. The compression of the muscles at this point is therefore something to be avoided, for it means additional effort at every step, and consequent weariness. Often this fatigue produces muscular rheumatism, and doctors' bills are the direct result of the frivolour bit of silk elastic, ribbon and silver which dealers call a garter.

"But," say the wearers of garters very truly, "we must have something to keep our stockings not only up over our shoe tops, but smooth." The stocking suspender is, according to the doctors. the thing which meets their needs. It extends from the corset or corset waist down the side almost to the knee in one undivided band. Three or four inches above the Page it divides into two parts, which extend in V-shape to the top of the stocking and clasp it with a tin or silver clasp, as the case may be. Unless the elastic is so short that it causes a jerk at every step, this suspender is absolutely hygienic. It may even be made almost as frivolously pretty as the round one, for its clasps may be of silver and itself of ribbonedged silk elastic. In winter it is comparatively easy to

hold the stocking in place by the suspender garter, for it clings to the silk or woolen union undersuit which all hygienically inclined women wear. In summer, when they are of slippery silk or lisle thread, and when there is no rough underwear surface to help in holding them in place, they are apt to slip slightly and lie in wrinkles above the shoe top. The truly hygienic woman bears this as bravely as she can, preferring wrinkles to compression. She relies upon the suspender garter to hold the stocking up, but she also wears a pair of somewhat loose round garters below the knee to keep the stockings from wrinkling. If the exigencies to tidiness absolutely demand the round garter, it is much better that it should be worn below the knee than above. For the leg just below the knee has extensive area of hone which ordinary clastic is nowerless to compress.—St. Louis Re-

JOHN AND HIS POCKETBOOK.

While in Wonderland the X Rays Showed Up Its Emptiness

Between the brass rail and the platform on which the X ray exhibition was being given recently in Wonderland a continual stream of people passed for hours. Carried by the current were Wo persons who kept an affectionate fold of each other's arms. Just as they cassed within the rail a man who saw conductor's punch in a pocketbook boulty asserted that "the thing had been fixed." The affable exhibitor smiled and shouted out:

"Use your own pocketbooks, ladies ind gentlemen. You can't see papers sr tickets, but you can see the outlines of the money." John's turn came.

"Use your own pocketbook, John," mid th girl.

"Oh, dat's all right, Mayme," soid folm. "De t'ing's straight, I don't terry none, anyhow."

"Yes, you do, too, You took some out of it to buy me that popeorn." "Dat's so. I forgot. But come on,

we's blockin's de pat'." But the girl insisted and John proluced the pocketbook. The exhibitor wild it in position. Mayme looked brough, but she saw no shadow of a Tin. She said the X rays were no good. The exhibitor, in self-defense, opened it and showed her that there was not a cert in it. The crowd laughed, Mayme dushed and John looked mad.—Detroit

Britain's Oucon Owns Some Fine Lane mens of Poultry.

There are plenty of proofs that the tastes of Queen Victoria are decidedly domestic, but none seems more convincing than that she is an enthus astic chicken raiser. The royal aylary, or, as the good New England housewife would call it, the queen's hencoop, as described in the London Feathered World by Artist Ernest M. Jessop, is a very elaborate affair.

The queen has her head "chicken man," who is aided by a large corps of experienced assistants. For 40 years the royal poultry hens were under female sopervision. Mrs. D'Albertanson, nov in charge of the queen's room at the kennels, being supervisor. A man

THE QUEEN'S CHICKEN MAN.

named Hammond has succeeded her. He knows all about chickens, their value and their artful ways.

Many breeds are kept in the royal aviary-gold and silver-spangled Hamburgs, gold and silver-penciled and black ones besides. Black, white and speckled Dorkings strut about in company with proud American Plymouth Rocks, black Minorcas, white Leghorns, Andalusians, white Rocks and Houdans. American Plymouth Rocks are, by the way, among the queen's favorites.

The bantams, as usual, are the pride of the roost. One named Toby is as tame as a kitten. He is Hammond's toy. When the keeper claps his hands the midget runs to him, jumps upon his hand and chanticleers to his heart's delight.

The chickens are let out daily in hatches of the same breed for an hour's run on the grass. For breakfast they get soft food and for the evening men! they get an abundance of wheat. There is no hospital at the royal aviary. As soon as one of the birds appears to be ailing it is put to death and afterwards cremated.

The most formidable creatures in the lot are the wild turkeys imported from Canada, but now thoroughly natural ized. Two beautiful golden eagles are among the curiosities of the collection. One was captured 30 years ago in Windsor forest. There are Aylesbury ducks, but not many. There are also golden pheasants and pigeons of various kinds. An average of 50 eggs a day are laid

by the bens. They go to the eastle, Buckingham palace and Osborne house The queen has an apartment at the eviary. It is a bright, supply room, with nearly cure white walls. A case of

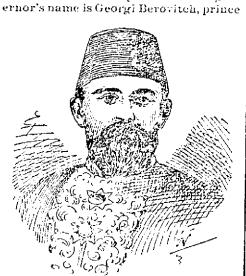

stuffed birds shot by the prince consort is the principal ornament. The aviary was once one of the popufor resorts of the royal family, and a tea service of dark blue and white Dresden chira is still in the house.

The royal aviary, as well as the royal kennels, is on the private road between Windsor and Frommors, and when at Windsor the queen never fails to look at some of her pets doily. The pictures used to illustrate this story are copyrighted by the artist, E. M. Jessup.

ST. PAUL'S CHURCH REOPENED.

Large Congregations Morning and Evening - All the Cost of Improvements Raised at Once.

St. Paul's Church, which has been undergoing repairs, was reopened, yesterday, and large congregations attended both the morning and evening services. The altar and pulpit were beautifully decorated with palms, ferus, cut flowers, smilax and golden rod in honor or the

. Presiding Elder Schriver was present as was also Prof. S. F. Upman, of Drew Theological Seminary, who preached at both the morning and evening services.

The improvements made to the church consist of trescoing the walls and ceilings of the audience room and lecture room; new carpets, recovering the cushions or the pews, repairing the stained glass windows, refinishing or the interior woodwork, an electric apparatus for lighting the gas and a new sidewalk, the latter probably the most important of all.

The cost of all these improvements was estimated at \$2,800, and it was desired to pay for them at once. Dr. Wilson had previously passed around a subscription paper and had secured pledges for \$2.-000, and after the services in the morning announced that an effort to raise the remaining \$800 would be made.

The people responded generously as usual, and about \$775 was subscribed in the morning and \$125 was secured in the evening, making the aggregate more than the sum asked for.

The Area's has already described the decorations in the auditorrim. The design is somewhat out of the ordinary. but the effect is very pretty. The carpet Is unit in color and the upbolstering is in cli zodi parsh. No church in the city has a hardsomeripter or than this one. Orange county proper long ago lost all interest in the fair as a county fair, but as a Newburgh fair many Orange county people visit it and some are exhibitors just as are citizens of Dutchess and Ulster counties who are within easy access of Newburgh. It is not and has not for several years been a county fair, in that it represents the agricultural interests of the county.

COMIC OPERA AT THE CASINO.

"Rob Roy" by the Whitney Opera Company, Wednesday Night,

Many theatre-goers would be perfectly willing to pay the advanced price necessary to secure more productions of the character of "Rob Roy" There is no reason why "Rob Roy" should be charged | Middletown will give an address in the Casmo than in the Herald Square Pheaire, provided the production is the same. The Whitney Opera Company, which will produce "Rob Roy" is under the same management that produced "The Penering Masfer" with Dorothy Morton and Katherine Germanne in the east.

AN ANCIENT CARRIAGE.

A Valuable Relic of Revolutionary Day From the Fishkill Standard

A carriage said to have been built in 1776, nearly 125 years ago, passed through this village on Wednesday. It is owned by Charles Haight, of New Hackensack. It was drawn by a team of horses and three persons were sented in it. It only had three wheels, the two wheels being of the usual size, while the one in front was very much smaller. The front wheel was on a line with the pole. It is an odd looking vehicle and attracted considerable attention. It is a valuable Revolutionary relic.

An Aged Resident of Montgomery In-Jured and His Wagon Smashed.

This morning, about 7:45 o'clock. as the train on the Montgomery branch of the Eric was leaving Montgomery, Alex. La Fountain attempted to drive over a crossing in the village, but had not calculated his chances correctly and the engine struck the rear platform of the wagon, wrecking it and throwing Mr. La Fountain out. He struck upon his head and received a severe scalp wound, and at last accounts it was feared he might have sustained a fracture or the skull.

Mr. La Fountain is over seventy years old, and even if there is no fracture of the skull, he will doubtless suffer severely from concussion and shock.

A ROAD ACCIDENT.

A Horse Frightened at an Electric Car Upsets a Carriage.

Yesterday a party or Middletowners drove to Bloomingburgh. One of the wagons was occupied by J. P. Tighe and a lady. When near the terminus of the electric road, north of the city, the horse shied at an electric car and upset the wagon, throwing both the occupants out. Fortunately neither was seriously hurt, their injuries consisting of scratches

The wagon was badly wrecked and when Mr. Tighe got up he was surprised to see the horse sitting on his haunches eating grass.

Bread at Two Cents a Loaf.

A grocer in the south end of Newburgh cut the price of bread to three cents a loai. Saturday, expecting to draw trade from a rival establishment across the way. The rival dealer at once lowered his price to two cents and at that figure both places sold bread all day.

For the Sake of His Italian Wife,

There was a christening in the Italian quarter, yesterday, accompanied by the usual festivities. John Charlock, who had taken unto himself an Italian wife espoused her religious faith and was baptized according to the rules of her church.

A PROPER DIET.

Avoidable Errors Are Responsible for Many Diseases. The nature and quantity of an appro-

priate diet must depend largely upon one's age. individual constitution, occupation, habits of life and, to some extent, upon the climate in which one lives. An active child 12 or 15 years old, who is growing fast and exercising freely, may require and assimilate as much food as a man past middle age.

In health, the appetite may be taken as a fair guide, and the child will seldom eat too much if he is taught to eat very slowly, and thoroughly to chew each mouthful.

Throughout the school years the growth of the body is continually going on, and, therefore, if a proper development is to be maintained, the food must be abundant and of a character to furnish new tissues and to yield energy in the form of heat and muscular activity.

The full adult weight is not usually attained before the 25th year, although in some instances it is reached earlier.

When the growth of the body and the development of the vital organs are completed, the use of food consists simply in maintaining the proper equilibrium of the tissues by replacing waste with new material, and in furnishing fuel for the development of force.

As men advance in life, become prosperous, and perhaps acquire more luxurious habits of living, they are apt to take less exerc'se and, at the same time. to be constantly tempted to indulge in food which is not needed and which is imperfectly consumed in the body.

On the other hand, quite as much ill may result from eating too little as from overindulgence. In either case the difficulty is made serious by long continuance.

So great is the force of habit over the different organs of the body that the stomach and intestines will usually rejeet undigested the contents of an oceassional excessive meal, whereas with habitual overeating they become accustomed to appropriating large quantities of food, which are absorbed, but which cannot be eliminated without

severely taxing the organs of exerction. Frequently the excess is stored up in the body and goes on accumulating un A the system rebels, and a violent billions. attack, by comiting and purging, brings relief

It is no evaggeration to say that woldable errors in diet are responsible for more than half the disease which embuters the middle and latter part of life.—Youth's Conquation.

-- The 121 largest cities in the country show a steady and almost uniform decrease in the average size of a femily.

There is more Cutarrh in this section of the country than all other diseases put together, and until the last lew years it was supposed to be incurable. For a great many years, doctors pronounced it. a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it mentable. Science has provenentarrh to be a constitutional disease, and, there ore, requires constitutional treatment. Hall's Catarrh Cure, manuactured by F Chency & Co., Toledo, Ohio, is the only

constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonul. If acts directly on the blood and nucous surfaces of the system. They offer one hundred dollars for any case it tails to cure. Send for circulars and testimonials. Address, F. J. CHENEY & CO., Toledo, O

offices, or factories, are peculiarly liable to female diseases, especially those who are constantly on their feet. Often they are unable to perform their duties, their suffering is so intense.

Lynn, Mass., stating symptoms: she will tell them exactly what to do, and in the meantime they will find prompt relief in Lydia E. Pinkham's Vegetable Compound, which can be obtained from any druggist.

"My Dear Mrs. Pineham:—I am so grateful to you for what your Compound has done for me. For four years I suffered such pains from ovarian trouble, which caused dreadful weakness of the limbs, tenderness and burning pain in the groins, pain when standing or walking, and increased pain during menstruation, headache and leucorrhœa. I weighed only 93 pounds, and was advised to use your Vegetable Compound, which I did. I felt the benefit before I had taken all of one bottle. I continued using it, and it has entirely cured me. I have not been troubled with leucorrhæa for months, and now I weigh 115 pounds." --LILLIE HARTSON, Flushing, Genesee Co., Michigan. Box 69.
